Stop the mains water supply with the flick of a switch

What is Surestop®?

Surestop is an innovative stopcock solution designed for faster, easier to access isolation of the mains cold water supply.

With the flick of a switch *Surestop* isolates the water supply in the event of a leak or water escape- without the need for an electrical supply or batteries. Quick to install and easy to use, *Surestop* is the ideal solution for protecting properties from water damage.

Why Surestop?

Instant protection: Instantly isolates the water supply with the flick of a switch

No power supply: No need for an electrical supply or batteries- powered by water pressure

Easy installation: Can be fitted in under an hour

No maintenance: *Surestop* will not seize or scale like traditional stopcocks

WRAS approved: Fully approved for use on cold mains water supplies

UK Manufactured: Developed and manufactured in the UK

Protect your property from the costs of water damage

Water damage can be extremely costly. The average claim for an escape of water on a household building insurance policy **can be over £9,000.***

Protecting your property with a means to quickly isolate the water supply in an emergency could help to easily prevent this.

Add peace of mind to your plumbing installations

Accessible isolation

With its unique remote switch design, *Surestop* can be located anywhere up to 6 metres away from the stopcock making it easily accessible in the event of a leak.

Switch it up with a *Surestop*

- **Proven quality**
Unique patented design with 100% UK-tested products
- **Widely available**
Available through most leading plumbing and heating stockists
- **Installer support**
Nearly 20 years of collaboration providing training and technical support for installers
- **Stockist support**
Comprehensive training and marketing support available
- **WRAS approved**
Fully approved for cold mains water supplies

Surestop stopcocks are quick to install and easy to use. Harnessing the power of the mains water supply pressure, *Surestop* operates hydraulically, eliminating the reliance on an electrical supply or batteries.

For the homeowner or landlord

Water damage, whether in a single home or across multiple properties can be expensive to fix and create significant disruption to a household.

Surestop provides an easily accessible means to isolate the water in the event of a leak or escape of water.

Ideal for both homeowners and landlords; protect your investment with the peace of mind of a *Surestop*.
